OVERVIEW OF FY 2022-23

National General Industries Limited (‘The Company’) is engaged in the production and selling of Steel. The Company has manufacturing facilities at Ghaziabad, Uttar Pradesh.

GLOBAL ECONOMY

The world economy maintained a steady growth trajectory at the start of CY 2022, following a gradual recovery from the pandemic, but it was disrupted by the outbreak of the Russia-Ukraine conflict, steadily rising inflation and delayed normalisation of global supply chains. Inflation was on an upswing following the massive stimulus injection to tide over the pandemic. As central banks prepared to squeeze out excess liquidity to rein in inflation, constrained supply chains were further aggravated by economic sanctions on Russia and China’s stringent shutdown to contain the spike in COVID-19 cases. This pushed inflation in advanced economies to multi-decadal highs, led by energy and commodity prices. Accelerated rate hikes by major central banks and slowing demand and investment sentiments impacted economic growth during the year.

Aggressive monetary tightening by central banks started showing the desired effect on Source: IMF World Economic Outlook, April 2023 demand. Tightening financial conditions in most regions and reducing liquidity in global markets led to a strong appreciation of the US dollar, further aided by its ‘safe haven’ status during periods of uncertainty. China’s ‘Zero COVID’ policy weakened local demand, which had a spill-over effect overseas, keeping global supplies under pressure and inflation higher.

However, as global demand weakened, commodity prices started easing in the third quarter. China’s earlier than expected re-opening in end of 2022 paved the way for a rebound in global economic activity and recovery in commodity prices.

INDIAN ECONOMY

The Indian economy stayed on a steady growth path, demonstrating strong resilience to multiple headwinds stemming from elevated inflation and a volatile global macro environment. The Indian economy is estimated to have grown by 7.2% in FY 2022-23, driven by strong private consumption, steady manufacturing and normalisation of contact-intensive services sectors. Although inflation remained above the upper band of the RBI’s comfort range of 4-6% for most part of FY 2022-23, it started easing during the third and fourth quarters, as the central bank hiked its policy rates by 250 basis points cumulatively to contain inflation. In April 2023, the RBI hit a pause to its rate hike cycle, and is widely expected to maintain it, if a benign inflationary environment persists.

The Indian economy growth stems from the resilience seen in the rebound of private consumption, seamlessly replacing the export stimuli as the leading driver of growth. The uptick in private consumption has also given a boost to production activity resulting in an increase in capacity utilisation across sectors. The rebound in consumption was engineered by the near-universal vaccination coverage overseen by the government, which brought people back to the streets to spend on contact-based services, such as restaurants, hotels, shopping malls, and cinemas, among others.

In FY 2022-23, growth has been principally led by private consumption and capital formation. The capex of the central government, which increased by 26% in FY 2022-23, was another growth driver in the current year. It has helped generate employment, seen in the declining urban unemployment rate and in the faster net registration in Employee Provident Fund. A sustained increase in private capex is also imminent with the strengthening of the balance sheets of the corporates and the consequent increase in credit financing it has been able to generate. The much-improved financial health of well-capitalised public sector banks has positioned them well to increase the credit supply.

OUTLOOK

High inflation curbs demand; supply faces margin pressure Global steel demand was impacted by high inflation and consequent aggressive monetary policy tightening by major central banks, coupled with supply chain bottlenecks. In 2022, the developed economies experienced a significant decline in steel demand due to factors such as monetary tightening and surging energy expenditure. Following a substantial decrease of 6.2% during CY 2022, there is an anticipation of a modest rebound with a projected 1.3% increase in steel demand for CY 2023. Looking ahead to CY 2024, a more substantial recovery of 3.2% is expected. Further, the looming energy crisis in the EU led to weakened sentiment, aggravated by the fear of potential gas rationing in the absence of Russian supplies. China's steel demand contracted by 4% in 2022.

In CY 2022, total crude steel production stood at 1,885 MnT, down 3.9% y-o-y, as steel producers reduced output in response to weak demand and weak margins due to falling steel prices and elevated raw material costs. The world's largest steel producer China recorded production of 1,018 MnT, a 1.6% y-o-y decline and Japan's production fell 7.4% y-o-y to 89.2 MnT. This was partly offset by a 6.0% y-o-y increase in production to 125.3 MnT in India.

India is the second-largest producer of crude steel in the world, with an output of 126.2 MnT in FY 2022-23. Crude steel production rose 5.0% year-over-year while finished steel consumption rose 13.3% to 119.9 MnT. Although production and consumption increased due to robust domestic demand, margins came under pressure due to high raw material and energy costs. The imposition of export duty on steel led to the built-up of domestic inventories, as exports became unviable in the weak global price environment. Further, few low-priced shipments from Russia and duty-free steel from FTA countries made their way to domestic markets, as imports rose sharply putting more pressure on steel prices.

OPPORTUNITIES, THREATS AND RISKS

Commodity prices are likely to remain volatile in 2023, given the ongoing Russia-Ukraine conflict and the expected slowdown in three largest economies in the world—the US, China and the EU. Further, the embargo on energy exports from Russia to the EU could lead to realignment of supply chains. Meanwhile, iron ore prices are likely to soften in the second half of CY 2023 due a seasonally stronger supply environment amid a depressed steel demand environment on the back of China's property market weakness and global manufacturing headwinds.

China's domestic steel demand has fallen 5% year-to-date while potential weakness in exports due to depressed prices could lead to lower steel production targets for CY 2023, and in turn, weigh heavily on iron ore demand as well as prices. Japan, the third largest steel producer, has recorded 16 consecutive months of falling steel production with the majority of output being directed for the Asia market. Further, with Europe now ramping up capacity utilisation, there would be limited scope to increase steel exports. India is likely to remain an outlier with a healthy steel production growth outlook, but the risk of government measures to protect supply of high-grade ore persists, such as the export tariffs imposed in CY 2022.

Against the backdrop of soft global economic outlook, India remains a bright spot with rising demand for steel. India domestic demand grew 13.3% year on year in FY 2022-23, recording consecutive two years of double-digit growth. According to ICRA, domestic steel demand is estimated to grow at 7-8% in FY 2023-24, owing to strong demand from end-user industries such as construction, infrastructure, automobile, real estate, and consumer durables and enabling steel players to maintain high-capacity utilization levels. In addition, the benefits of easing raw material prices are expected to flow through Q2 FY 2023-24 onwards. Further, the rollback of export duty should support exports.

SEGMENT-WISE PERFORMANCE

A detailed note on the segment-wise performance is given under note no. 25 of the Financial Statement of the Company.

- ⇒ Identify and assess the risks of material misstatement of the Standalone Ind AS financial statements whether due to fraud or error design and perform audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion forgery intentional omissions misrepresentations or the override of internal control.
- ⇒ Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls with reference to Financial Statement in place and the operating effectiveness of such controls.
- ⇒ Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- ⇒ Conclude on the appropriateness of management's use of the going concern basis of accounting and based on the audit evidence obtained whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists we are required to draw attention in our auditor's report to the related disclosures in the Standalone Ind AS financial statements or if such disclosures are inadequate to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However future events or conditions may cause the Company to cease to continue as a going concern.
- ⇒ Evaluate the overall presentation structure and content of the Standalone Ind AS financial statements including the disclosures and whether the Standalone Ind AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- ⇒ Obtain sufficient appropriate audit evidence regarding the financial information of the entity or business activities to express an opinion on the Standalone Ind AS financial statement. We are responsible for the direction, supervision and performance of the audit of the financial statement of such entries included in the financial statement of which we are the independent auditors. For the other entity included in the Standalone Ind AS financial Statement.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding among other matters the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance we determine those matters that were of most significance in the audit of the Standalone Ind AS financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Annexure – “C” to the Auditors’ Report

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls over financial reporting of National General Industries Ltd (“the Company”) as of 31 March 2023 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India (‘ICAI’). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors’ Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the “Guidance Note”) and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Financial Statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that:

- (1) Pertains to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorization of management and directors of the company; and
- (3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the Financial Statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2023, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

i) Financial Assets

A. Initial recognition and measurement

All financial assets and liabilities are initially recognized at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities, which are not at fair value through profit or loss, are adjusted to the fair value on initial recognition. Purchase and sale of financial assets are recognised using trade date accounting.

B. Subsequent measurement

a) Financial assets carried at amortised cost (AC)

A financial asset is measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

b) Financial assets at fair value through other comprehensive income (FVTOCI)

A financial asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

c) Financial assets at fair value through profit or loss (FVTPL)

A financial asset which is not classified in any of the above categories are measured at FVTPL.

C. Other Equity Investments

All other equity investments are measured at fair value, with value changes recognised in Statement of Profit and Loss, except for those equity investments for which the Company has elected to present the value changes in Other Comprehensive Income’.

D. Impairment of financial assets

In accordance with Ind AS 109, the Company uses ‘Expected Credit Loss’ (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

The 12-months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument)

For trade receivables Company applies ‘simplified approach’ which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Company uses historical default rates to determine impairment loss on the portfolio of trade receivables. At every reporting date these historical default rates are reviewed and changes in the forward looking estimates are analysed.

For other assets, the Company uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

ii) Financial liabilities

A. Initial recognition and measurement

All financial liabilities are recognized at fair value and in case of loans, net of directly attributable cost. Fees of recurring nature are directly recognised in the Statement of Profit and Loss as finance cost.

B. Subsequent measurement

Financial liabilities are carried at amortized cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

a) Exemptions from retrospective application

(i) Business combination exemption

The Company has applied the exemption as provided in Ind AS 101 on non-application of Ind AS 103, “Business Combinations” to business combinations consummated prior to April 1, 2015 (the “Transition Date”), pursuant to which Goodwill / capital reserve arising from a business combination has been stated at the carrying amount prior to the date of transition under Indian GAAP. The Company has also applied the exemption for past business combinations to acquisitions of investments in subsidiaries / associates / joint ventures consummated prior to the Transition Date.

(ii) Share-based payment transactions

Ind AS 101 encourages, but does not require, first time adopters to apply Ind AS 102 Share based Payment to equity instruments that were vested before the date of transition to Ind AS. The Company has elected not to apply Ind AS 102 to options that vested prior to April 1, 2015.

(iii) Fair value as deemed cost exemption

The Company has elected to measure items of property, plant and equipment and intangible assets at its carrying value at the transition date except for certain class of assets which are measured at fair value as deemed cost.

(iv) Decommissioning liabilities

The Company has elected to apply the transitional provision with respect to recognition of Decommissioning, Restoration and Similar Liabilities.
